

## BDCP RDEIR/SDEIS Review Document Comment Form

Document: Administrative Draft—Chapter/AppendixD subst. revisions\_\_\_\_\_

Comment Source: NMFS

Submittal Date: April 15, 2015

No.	Page	Line #	Comment	ICF Response
1	6,10	35,26	Change maximizing survival rates to something more appropriate like- <i>minimizing survival rate reductions at the new NDD intakes....</i> The project is not maximizing survival of salmonids, the best it can do is minimize impacts and/or increase survival through enhanced flow/habitat. Change this misleading phrasing wherever it occurs.	
2	21	17-32	RTO language in this section needs to be updated and consistent with the new Proposed Action text for RTO decision-making.	
3	160	Table 3.6-15	This is a valuable addition to the planning document. Please confirm that the key uncertainties and studies needed that apply to CM1 (and by association CM15-16) will be carried forth if Alt 4A is the proposed project. These studies and efforts should still apply without the conservation plan originally proposed.
